Envodex Consulting Engineers and Facade Solutions

Facade Structural Engineering Consultancy

8+ Years of Engineering Excellence

- Façade Structural Design
- Engineering Consultancy
- Thermal & Energy Analysis
- Technical Support
- 3rd Party Review & Stamping

WHO WE ARE

Envodex is a specialized façade structural engineering consultancy dedicated to delivering innovative, efficient, and sustainable solutions for modern building envelopes. With over 8 years of professional expertise, we combine technical precision, design sensitivity, and global best practices to provide end-to-end façade consultancy services.

We work closely with architects, developers, and contractors to bring visionary designs to life while ensuring performance, safety, and cost efficiency.

OUR APPROACH

At Envodex, we believe in blending creativity with engineering accuracy. Every project is tailored to meet the unique vision of our clients while ensuring international standards and long-term performance. From initial concept through to construction completion, our engineers provide consistent, hands-on support at every stage.

WHY CHOOSE US

- 8+ years of façade structural engineering expertise
- Proven track record with international clients across UAE, UK & Croatia
- Strong focus on sustainability and cost-effectiveness
- End-to-end consultancy from concept to completion
- Deep knowledge of international facade standards and codes
- Collaborative approach with architects, developers and contractors

8+	3	5	100%
YEARS EXPERIENCE	COUNTRIES SERVED	CORE SERVICES	CLIENT FOCUS

KEY CLIENTS & INDUSTRY PARTNERS

Trusted by leading global facade contractors & specialist fabricators

- Permasteelisa Group
- Future Glazing
- Realiteza
- GFS d.o.o.

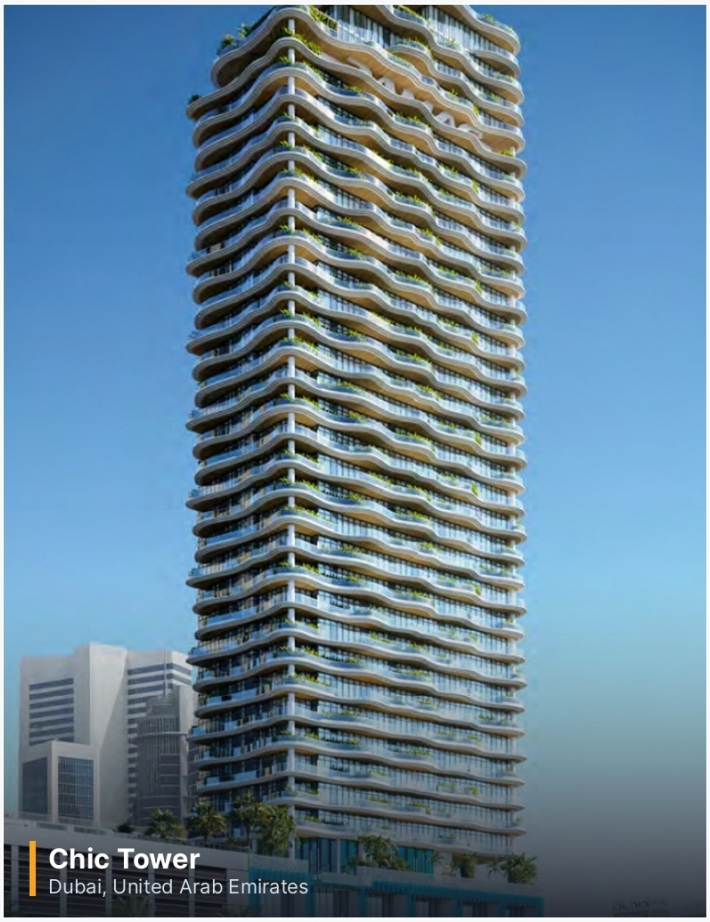

03 RECENT PROJECTS

Selected Landmark Façade Engineering Projects

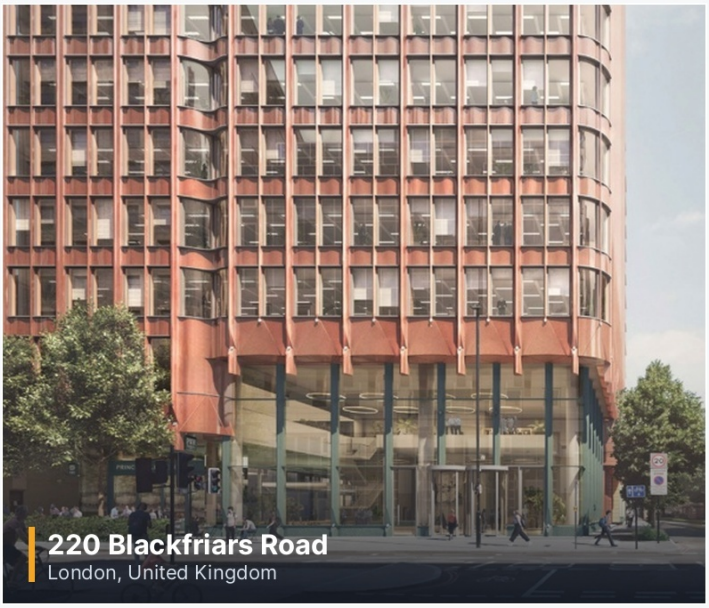

ENVODEX
CONSULTING ENGINEERS

Masdar City — The Link
Dubai, United Arab Emirates

Chic Tower
Dubai, United Arab Emirates

220 Blackfriars Road
London, United Kingdom

One North Quay
London, United Kingdom

KAPSARC University
Riyadh, Saudi Arabia

04 OUR SERVICES

End-to-End Façade & Envelope Engineering

ENVODEX
CONSULTING ENGINEERS

01 Façade Structural Design

Advanced engineering solutions for curtain walls, glazing, cladding, skylights, and other façade systems. We perform rigorous structural analysis to ensure safety, performance,

- Curtain wall structural analysis
- Glazing & cladding design
- Skylight engineering
- Wind & seismic load assessment
- Connection & fixation design

02 Engineering Consultancy

Detailed design, value engineering, and optimization for complex building envelopes. We help clients achieve superior performance while maintaining cost efficiency and

- Value engineering
- Detailed design development
- Buildability optimization
- Technical specification writing
- Design coordination & review

03 Performance Analysis

Thermal, acoustic, structural, and safety assessments for façade systems. Our analysis services ensure your envelope meets stringent performance benchmarks and green building

- Thermal & U-value analysis
- Acoustic assessment
- Solar & Daylighting Studies
- Condensation risk assessment
- LEED / BREEAM support

04 Technical Support

Tender documentation, shop drawing reviews, and compliance checks. Envodex provides specialist technical review services throughout procurement and fabrication to ensure

- Tender document preparation
- Shop drawing review
- Compliance checking
- Fabrication coordination
- Material specification support

05 3rd Party Review & Stamping

Independent structural review and professional engineer stamping for facade projects. We provide certified third-party verification of facade designs, calculations and

- Independent structural design review
- PE stamping for authority submissions
- Calculation verification & sign-off
- Regulatory compliance review
- Facade drawing certification

COMPUTATIONAL SOFTWARE SUITE

Specialized Structural, Glass & Thermal Analysis

Strand7 (FEA)
3D non-linear finite element structural modeling, complex bracketry & custom extrusion analysis.

Staad Pro
Primary framework design, wind load simulation & global building envelope interaction.

SJ Mepla
Specialized glass stress analysis, laminated units, point-fixed glass & post-breakage capacity.

LBNL THERM & WINDOW
2D FEA thermal bridging calculations, overall U-value optimization & condensation risk analysis.

DESIGN CODES & STANDARDS

International Envelope Engineering Benchmarks

CWCT Standards (UK)
Standard for Systemised Building Envelopes, weathertightness & dynamic impact compliance.

Eurocodes (BS EN)
EN 1990 / 1991 (Wind/Dead loads), EN 1993 (Steel), EN 1999 (Aluminium), EN 16612 (Structural Glass).

ASTM International (US / Global)
ASTM E1300 (Glass load capacity), ASTM E283/E330 /E331 (Air leakage, structural & water penetration).

Regional Authority Regulations
UAE Fire & Life Safety Code, Dubai Municipality PE submissions & UK Building Safety Act alignment.

CLIENT LOCATIONS

We proudly serve clients across three international markets:

United Arab Emirates
Dubai • Abu Dhabi • Sharjah

UAE's booming construction sector — high-rise towers & world-class commercial facades.

United Kingdom
England, Scotland & Wales

Complex refurbishment & new-build projects with rigorous compliance & sustainability benchmarks.

Croatia
Adriatic & Central Europe

Growing infrastructure & hospitality projects requiring specialist facade engineering expertise.

TECHNICAL CAPABILITIES

Curtain Wall Systems
Unitised, stick, SSG and point-fixed glazing structural design.

Cladding & Rainscreen
Metal, stone, GRC and composite panel support structure design.

Skylight Engineering
Structural design of skylights, rooflights and atria glazing.

Wind Engineering
Facade wind load determination and wind tunnel liaison.

Thermal & Energy Analysis
U-value calculation, thermal bridging and condensation analysis.

Seismic & Movement Detailing
Drift accommodation and isolation detailing for seismic zones.

OUR APPROACH

01 — Feasibility & Concept
Early-stage structural and performance feasibility — facade system selection, cost assessment, programme risk

02 — Design Development
Detailed structural analysis, thermal modelling and specification. Coordinating with architects and MEP engineers for

03 — Detailed Design
Full structural calculations, connection details, fixation design and shop drawing production ready for fabrication.

04 — 3rd Party Review & Stamping
Independent structural review and PE stamping for authority submissions. Certified verification of facade designs,

SECTORS WE SERVE

Commercial & Office
High-rise towers, HQ buildings, office campuses

Hospitality
Hotels, resorts and luxury mixed-use developments

Cultural & Civic
Museums, theatres, airports and public buildings

Healthcare
Hospitals, research centres and specialist facilities

Residential
Premium apartments and large housing developments

Retail & Leisure
Shopping centres, flagship stores, sports venues

Industrial & Tech
Data centres, manufacturing and technical buildings
